Volume 3PT shooter

2025-26 at Texas Tech Red Raiders, 33 games

Ranked by points per game. Uses this season's numbers once a player has 5 games, otherwise last season's, wherever he played. Shot shares are of his field goal attempts. Labels are fixed rules, such as 4+ threes a game at 35% or better for a volume shooter.

1749 shots by the current roster last season. D1 average is every shot in the database (310,206 shots). Zones are approximate because shot locations are charted by hand.

WHAT DECIDES THEIR GAMES: WINS VS LOSSES, 2025-26 (24-12)

These trends are from last season's team, which returns only 48% of its minutes. They say more about how this coach's teams win than about these players. They switch to this season automatically once UCLA has 3 wins and 3 losses.

- **FG %:** 48.8% in wins vs 42.6% in losses.

Roster columns add up what the players on each current roster did last season, wherever they played, and scale it to one 40-minute game. Players without D1 stats are left out, and transfers' numbers come from different teams and roles, so treat these as a rough profile, not a prediction. **Team column** is last season's actual team, which matters less the more the roster turned over.

Last season: 24-12, 77.1 points scored and 71.1 allowed per game.

How this was made: generated automatically by make_report.py from ESPN box scores and play-by-play, with the 2026-27 roster taken from the school's official athletics site. Every number is recalculated each time the report is built, so it updates as new games are added. Box scores can't measure defense by individual player or how roles change on a new team; film fills those gaps.
